PARTICIPATING COMPANIES

Shopic

Shopic provides store digitalization solutions to grocery retailers. Powering the world's largest smart cart deployments, we bring the advantages of online commerce to physical supermarkets. Our unique clip-on device uses computer vision to turn any regular shopping cart into a smart cart. It delivers a smooth shopping experience with cashier-less checkout, highly effective in-store retail media, and analytical insights from the retail floor.

FLYTREX

Flytrex Aviation

With more than 70K deliveries to date, Flytrex is the largest drone-based on demand delivery service in the US, offering 10X lower delivery costs and a faster service than DoorDash and Uber Eats. Flytrex is delivering hundreds of orders daily utilizing its proprietary FAA certified drones and its own marketplace app, and has signed commercial agreements with dozens of restaurant chains.

illumex.ai

Generative AI has unlocked endless possibilities for enterprises. But in order to achieve maximum value, companies first need to guarantee that their underlying data is reliable so that any crucial business decisions made using AI are based on complete, definition-aligned, and accurate information. That's why illumex developed a turnkey Generative Semantic Fabric that streamlines the process of data and analytics mapping, interpretation and GenAI governance. illumex's domain-specific generative AI engine brings business users a hallucinations-free ChatGPT-like experience they can fully trust, which makes your organizational LLM prompting smooth, governed and customized.

PARTICIPATING COMPANIES

Edgify

Edgify AI Ltd

At Edgify, we specialize in delivering cutting-edge product recognition and loss prevention solutions, tailored specifically for the retail industry. Our innovative approach leverages a proprietary distributed collaborative training framework, enabling Checkouts and Scales in stores globally to learn from each other without the need of a server in store or a cloud infrastructure. This unique method enhances our system's intelligence with every transaction, setting new standards for accuracy and efficiency in retail operations.

Flow-Retail

Flow Retail introduces an innovative Shrink Prevention Platform for autonomous shopping. With our advanced AI & machine vision technology, retailers can significantly cut down inventory loss by 50-80%. The implementation is straightforward and user-friendly, enabling smooth integration with any existing self-checkout and shopping cart systems.

flow-retail.com | CEO – Shlomi Funk | shlomi.funk@flow-retail.com

Moonshot AI

Moonshot AI is a No-code solution that optimizes e-commerce stores automatically. The platform utilizes the power of generative AI to enable brands to constantly iterate on CRO experiments, without requiring design, analysis, or developer resources.

moonshot-ai.com | CTO – Evyatar Segal | evyatar@moonshot-ai.com

SpeedSize

Speedsize

Load your website images & videos up to 10x faster, with 100% original quality. SpeedSize™ no-code AI-driven platform delivers the fastest visual experience in the market.

speedsize.com | CTO – Vlad Malanin | vlad@speedsize.com

Adapt

Adapt is a global leader in retail AI, helping retailers to enhance consumer experience and beat competition by clear insights and 100% picture on consumer and online landscape based on cutting edge proprietary AI technology.

adapt.online | CEO – Galiya Simanovsky | galiya.s@adapt.online

Getpackage

GetPackage is disrupting the last mile delivery industry by providing same-day delivery service for a fixed fee of \$8.5. By integrating the Uber and VIA models and utilizing its AI-driven dynamic routing technology with its courier platform based on shared-economy model (and crowd sourcing), it allows for a fast and low cost delivery. Having successfully completed over 2 million deliveries for approximately 20,000 businesses.
